|                                                                                                                                                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Decreased Heat Shock Response upon Adipose Differentiation of 3T3-L1 Cells<br><i>Alice Y.-C. Liu, Hueng-Sik Choi, and Myong Suk Bae-Lee</i>                                                                                                                                                                            | 1   |
| Diacylglycerol and Phosphatidate Production and the Exocytosis of the Sperm<br>Acrosome<br><i>E. R. S. Roldan and R. A. P. Harrison</i>                                                                                                                                                                                | 8   |
| N-Glycosylated and Unglycosylated Forms of Caprine Trophoblast Protein-1 Are<br>Secreted by Preimplantation Goat Conceptuses<br><i>George A. Baumbach, Robert T. Duby, and James D. Godkin</i>                                                                                                                         | 16  |
| Solubilization and Partial Purification of GABA <sub>B</sub> Receptor from Bovine Brain<br><i>Yoshiyuki Ohmori and Kinya Kuriyama</i>                                                                                                                                                                                  | 22  |
| Estrous Cycle-Dependent Regulation of Peptidylarginine Deiminase Transcripts<br>in Female Rat Pituitary<br><i>Kazutada Watanabe, Kiyoko Hikichi,<br/>Saburo Nagata, and Tatsuo Senshu</i>                                                                                                                              | 28  |
| The Primary Structure of Rat Ribosomal Protein L12<br><i>Katsuyuki Suzuki, Joe Olvera, and Ira G. Wool</i>                                                                                                                                                                                                             | 35  |
| Four Disulfide Bonds' Allocation of Na <sup>+</sup> , K <sup>+</sup> -ATPase Inhibitor (SPAI)<br><i>K. Araki, M. Kuwada, O. Ito, J. Kuroki, and S. Tachibana</i>                                                                                                                                                       | 42  |
| Changes in Intracellular Calcium of Porcine Sperm during <i>in Vitro</i> Incubation<br>with Seminal Plasma and a Capacitating Medium<br><i>R. Zhou, B. Shi, K. C. K. Chou, M. D. Oswalt, and A. Haug</i>                                                                                                               | 47  |
| Insulin-like Growth Factor 1 Supports Embryonic Nerve Cell Survival<br><i>Dragana Svrzic and David Schubert</i>                                                                                                                                                                                                        | 54  |
| Overexpression of the CDC25 Gene, an Upstream Element of the RAS/Adenylyl<br>Cyclase Pathway in <i>Saccharomyces cerevisiae</i> , Allows Immunological<br>Identification and Characterization of Its Gene Product<br><i>Marco Vanoni, Monica Vavassori, Gianni Frascotti,<br/>Enzo Martegani, and Lilia Alberghina</i> | 61  |
| Extracellular Depolymerization of Hyaluronic Acid in Cultured Human Skin<br>Fibroblasts<br><i>Toshiya Nakamura, Keiichi Takagaki, Kohmei Kubo,<br/>Akiko Morikawa, Shinri Tamura, and Masahiko Endo</i>                                                                                                                | 70  |
| A Role of Lysophosphatidyl Choline in GM3-Dependent Inhibition of Epidermal<br>Growth Factor Receptor Autophosphorylation in A431 Plasma Membranes<br><i>Yasuyuki Igarashi, Kazuya Kitamura,<br/>Qinghong Zhou, and Sen-itiroh Hakomori</i>                                                                            | 77  |
| The Strong Hepatocarcinogenicity of the Electrophilic and Mutagenic Metabolite<br>6-Sulfooxymethylbenzo[a]pyrene and Its Formation of Benzylic DNA<br>Adducts in the Livers of Infant Male B6C3F <sub>1</sub> Mice<br><i>Young-Joon Surh, Amy Liem, Elizabeth C. Miller, and James A. Miller</i>                       | 85  |
| Protein Oxidation and Myelinolysis Occur in Brain following Rapid Correction of<br>Hyponatremia<br><i>Hubert S. Mickel, Cynthia N. Oliver,<br/>and Pamela E. Starke-Reed</i>                                                                                                                                           | 92  |
| Oxidative C4-Demethylation of 24-Methylene Cycloartanol by a Cyanide-<br>Sensitive Enzymatic System from Higher Plant Microsomes<br><i>Sophie Pascal, Maryse Taton, and Alain Rahier</i>                                                                                                                               | 98  |
| Effect of Heparin on the Binding Affinity of Acidic FGF for the Cloned Human<br>FGF Receptors, flg and bek<br><i>June M. Kaplow, Françoise Bellot,<br/>Gregg Crumley, Craig A. Dionne, and Michael Jaye</i>                                                                                                            | 107 |

| An Active Site of Growth Hormone for Eliciting the Differentiation of Preadipose 3T3-F442A Cells to Adipose Cells<br><i>Eriko Uchida, Seitaro Shimokawa, Yoshitaka Nishida, Hisashi Takasu, Morio Ikehara, Seiichi Uesugi, Ken-ichi Tomita, Akira Tanaka, Minoru Morikawa, Takao Hayakawa, and Satoshi Nishikawa</i> | 357 |
| Peroxisomal Disorders: Complementation Analysis Using $\beta$ -Oxidation of Very Long Chain Fatty Acids<br><i>M. C. McGuinness, A. B. Moser, H. W. Moser, and P. A. Watkins</i>                                                                                                                                      | 364 |

### Volume 172, Number 2, October 30, 1990

|                                                                                                                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Difference in Murine CDC2 Kinase Activity between Cytoplasmic and Nuclear Fractions during the Cell Cycle<br><i>Hideyo Yasuda, Masayuki Kamijo, Reiko Honda, Miho Nagahara, and Yoshiki Ohba</i>                                                            | 371 |
| Striking Similarity of the Distribution Patterns of the Poly(ADP-ribose) Polymerase and DNA Polymerase $\beta$ among Various Mouse Organs<br><i>Tsutomu Ogura, Nobuko Takenouchi, Masamitsu Yamaguchi, Akio Matsukage, Takashi Sugimura, and Hiroyasu Esumi</i> | 377 |
| Antioxidant Activity of 6-Phosphatidyl-L-ascorbic Acid<br><i>Akihiko Nagao and Junji Terao</i>                                                                                                                                                                  | 385 |
| Inhibition of Biological Actions of Big Endothelin-1 by Phosphoramidon<br><i>Takahiro Fukuroda, Kazuhito Noguchi, Sonoko Tsuchida, Masaru Nishikibe, Fumihiko Ikemoto, Kenji Okada, and Mitsuo Yano</i>                                                         | 390 |
| Occurrence of Transketolase Abnormalities in Extracts of Foreskin Fibroblasts from Patients with Alzheimer's Disease<br><i>Francesco Paoletti, Alessandra Mocali, Marco Marchi, Sandro Sorbi, and Silvia Piacentini</i>                                         | 396 |
| Induction of an Altered DNA Conformation by an Inversion Rearrangement in the 5'-Flanking DNA of a U1 RNA Gene<br><i>Kenneth A. Roebuck and William E. Stumph</i>                                                                                               | 402 |
| Protein Kinase C Activation Selectively Increases mRNA Levels for One of the Regulatory Subunits (RI $\alpha$ ) of cAMP-Dependent Protein Kinases in HT-29 Cells<br><i>Kjetil Taskén, Dag Kvale, Vidar Hansson, and Tore Jahnsen</i>                            | 409 |
| Synthesis of 3-(4-Azido-5-iodosalicylamido)-4-hydroxycoumarin: Photoaffinity Labeling of Rat Liver Dicoumarol-Sensitive NAD(P)H:Quinone Reductase<br><i>David G. Myszka and Richard P. Swenson</i>                                                              | 415 |

|                                                                                                                                                          |                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Sequential Mechanism of Atrial Natriuretic Peptide Secretion in Isolated Perfused Rabbit Atria                                                           | <i>Kyung Woo Cho, Kyung Hwan Seul, Suhn Hee Kim, Gou Young Koh, Kyung Mee Seul, and Yun Ha Hwang</i>                                   | 423 |
| The Binding of ATP and AMP to <i>Escherichia coli</i> Adenylate Kinase Investigated by $^1\text{H}$ and $^{15}\text{N}$ NMR Spectroscopy                 | <i>John Glushka, Octavian Bârzu, Robert S. Sarfati, Vinod K. Kansal, and David Cowburn</i>                                             | 432 |
| Isolation and Characterization of a Unique Kidney Antigen of Relevance in Human Renal Disease                                                            | <i>Reinhold Kittelberger and T. James Neale</i>                                                                                        | 439 |
| TPA Inhibits Insulin Stimulated PIP Hydrolysis in Fat Cell Membranes: Evidence for Modulation of Insulin Dependent Phospholipase C by Protein Kinase C   | <i>M. Kellerer, E. Seffer, J. Mushack, B. Obermaier-Kusser, and H. U. Häring</i>                                                       | 446 |
| Purification of the Pyocin S2 Complex from <i>Pseudomonas aeruginosa</i> PAO1: Analysis of DNase Activity                                                | <i>Younghoon Seo and D. R. Galloway</i>                                                                                                | 455 |
| Characterization and Behavior of 15-Lipoxygenase during Peanut Cotyledonary Senescence                                                                   | <i>T. Rajendra Prakash, P. M. Swamy, P. Suguna, and P. Reddanna</i>                                                                    | 462 |
| Inhibition of $\text{TGF}\alpha$ Induced Second Messengers by Anti-EGF Receptor Antibody-425                                                             | <i>U. Murthy, D. J. Rieman, and U. Rodeck</i>                                                                                          | 471 |
| Removal of 12 C-Terminal Amino Acids from Firefly Luciferase Abolishes Activity                                                                          | <i>Graciela Sala-Newby, Noor Kalsheker, and Anthony K. Campbell</i>                                                                    | 477 |
| Quantitative Determination of Deleted Mitochondrial DNA Relative to Normal DNA in Parkinsonian Striatum by a Kinetic PCR Analysis                        | <i>Takayuki Ozawa, Masashi Tanaka, Shin-ichiro Ikebe, Kinji Ohno, Tomoyoshi Kondo, and Yoshikuni Mizuno</i>                            | 483 |
| Identification of Pristanoyl-CoA Oxidase Activity in Human Liver and Its Deficiency in the Zellweger Syndrome                                            | <i>R. J. A. Wanders, H. J. ten Brink, C. W. T. van Roermund, R. B. H. Schutgens, J. M. Tager, and C. Jakobs</i>                        | 490 |
| Autoantibodies Specific for the 20-kDa Ribosomal Large Subunit Protein L12                                                                               | <i>Takehiro Sato, Toshio Uchiumi, Ryo Kominami, and Masaaki Arakawa</i>                                                                | 496 |
| Isolation of Anti-endothelin Receptor Monoclonal Antibodies for Use in Receptor Characterization                                                         | <i>Motohiro Kondoh, Hitoshi Miyazaki, Hirotoshi Watanabe, Takeshi Shibata, Masashi Yanagisawa, Tomoh Masaki, and Kazuo Murakami</i>    | 503 |
| A Structural Protein of Hepatitis C Virus Expressed in <i>Escherichia coli</i> Facilitates Accurate Detection of Hepatitis C Virus                       | <i>Kanae Muraio, Makoto Hijikata, Showgo Ohkoshi, Myung-Je Cho, Masayoshi Kikuchi, Nobuyuki Kato, and Kunitada Shimotohno</i>          | 511 |
| An ATP, Calcium, and Voltage Sensitive Potassium Channel in Porcine Coronary Artery Smooth Muscle Cells                                                  | <i>Shai D. Silberberg and Cornelis van Breemen</i>                                                                                     | 517 |
| Isolation of Three Allergenic Fractions of the Major Allergen from <i>Olea europea</i> Pollen and N-Terminal Amino Acid Sequence                         | <i>Mayte Villalba, Carlos López-Otín, Elena Martín-Orozco, Rafael I. Monsalve, Pilar Palomino, Carlos Lahoz, and Rosalía Rodríguez</i> | 523 |
| Possible Binding Site of Thyrotropin Binding Inhibitor Immunoglobulin (TBII) on the Thyrotropin (TSH) Receptor, Which Is Different from TSH Binding Site | <i>Thavatchai Piraphatdist, Hideo Sugawa, Daisuke Inoue, Tetsuya Enomoto, Toru Mori, and Hiroo Imura</i>                               | 529 |

|                                                                                                                                                             |                                                                                                                                |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|-----|
| Sugar Modified Oligonucleotides. III (1). Synthesis, Nuclease Resistance, and Base Pairing Properties of $\alpha$ - and $\beta$ -L-Octathymidylates         | <i>François Morvan, Corinne Genu, Bernard Rayner, Gilles Gosselin, and Jean-Louis Imbach</i>                                   | 537 |
| Isolation and Characterization of a Metalloproteinase Secreted by Rat Glioma Cells in Serum-Free Culture                                                    | <i>Garry J. Rucklidge, Morten Lund-Johansen, George Milne, and Rolf Bjerkvig</i>                                               | 544 |
| Phosphorylation of Calcineurin: Effect on Calmodulin Binding                                                                                                | <i>Mihail B. Calalb, Randall L. Kincaid, and Thomas R. Soderling</i>                                                           | 551 |
| Modulation of the Constitutive Gene Expression of the 55-kDa Tumor Necrosis Factor Receptor in Hematopoietic Cells                                          | <i>Lena Lindvall, Mikael Lantz, Urban Gullberg, and Inge Olsson</i>                                                            | 557 |
| Cultured Astrocytoma Cells Inhibit Platelet Aggregation by Releasing a Nitric Oxide-like Factor                                                             | <i>Vincenzo Mollace, Daniela Salvemini, Erik Ånggård, and John Vane</i>                                                        | 564 |
| Expression of the Murine Interleukin-5 Receptor on <i>Xenopus laevis</i> Oocytes                                                                            | <i>Rene Devos, Jan Tavernier, Geert Plaetinck, Jose Van der Heyden, Antonius Rolink, and Walter Fiers</i>                      | 570 |
| Solubilization of Endothelin Receptors from Bovine Lung Plasma Membranes in a Nonaggregated State and Estimation of Their Minimal Functional Sizes          | <i>Hiromi Hagiwara, Masamichi Kozuka, Satoru Eguchi, Sadami Shibabe, Teizo Ito, and Shigehisa Hirose</i>                       | 576 |
| Calcitonin Gene-Related Peptide Stimulates Adenylate Cyclase Activity in Trout Gill Cell Membranes                                                          | <i>M. Fouchereau-Peron, Y. Arlot-Bonnemains, G. Milhaud, and M. S. Moukhtar</i>                                                | 582 |
| Trehalose, the Insect Blood Sugar, Inhibits Loading of Diacylglycerol by Lipophorin from the Fat Body in Locusts                                            | <i>Pek Yee Lum and Haruo Chino</i>                                                                                             | 588 |
| Platelet Factor 4 Blocks the Binding of Basic Fibroblast Growth Factor to the Receptor and Inhibits the Spontaneous Migration of Vascular Endothelial Cells | <i>Yasufumi Sato, Mayumi Abe, and Ryosaburo Takaki</i>                                                                         | 595 |
| Superoxide Anion Radical Induces Lipid Phase Transitions That Mimic Temperature-Induced Phase-Transition Phenomenon of Membrane Lipids                      | <i>Pradeep Kumar G., Neela Tillo, Malini Laloraya, Manish Nivsarkar, Saguna Verma, and Aparna Singh</i>                        | 601 |
| Purification of a Cytochrome P450 Isozyme Belonging to a Subfamily of P450 IIB from Liver Microsomes of Guinea Pigs                                         | <i>Shizuo Narimatsu, Yuko Akutsu, Tamihide Matsunaga, Kazuhito Watanabe, Ikuo Yamamoto, and Hidetoshi Yoshimura</i>            | 607 |
| Activation of Soluble Guanylate Cyclase by Nitrovasodilators Is Inhibited by Oxidized Low-Density Lipoprotein                                               | <i>Kurt Schmidt, Wolfgang F. Graier, Gerhard M. Kostner, Bernd Mayer, and Walter R. Kukovetz</i>                               | 614 |
| Neutral Endopeptidase (EC 3.4.24.11) Is Highly Expressed on Osteoblastic Cells and Other Marrow Stromal Cell Types                                          | <i>Fred E. Indig, Daphna Benayahu, Adina Fried, Shlomo Wientroub, and Shmaryahu Blumberg</i>                                   | 620 |
| Gene and Precursor Structure of Porcine C-Type Natriuretic Peptide                                                                                          | <i>Yasunori Tawaragi, Kayoko Fuchimura, Hiroshi Nakazato, Shoji Tanaka, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo</i> | 627 |

|                                                                                                                                                                                                             |                                                                                                                              |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|-----|
| Development-Dependent Expression of Low Molecular Weight GTP-Binding Proteins in Embryonic Chicken Brain                                                                                                    | <i>Fran-Josef Klinz</i>                                                                                                      | 633 |
| Cell Adhesion Regulates Melanoma Specific Differentiation and Interactions with the 3' Region of the Tyrosinase Gene                                                                                        | <i>María I. Morasso, Mary S. Rieber, Francisco Gil, and Manuel Rieber</i>                                                    | 638 |
| A T-to-A Substitution in the E <sub>1</sub> $\alpha$ Subunit Gene of the Branched-Chain $\alpha$ -Ketoacid Dehydrogenase Complex in Two Cell Lines Derived from Menonite Maple Syrup Urine Disease Patients | <i>Ichiro Matsuda, Yoshitaka Nobukuni, Hiroshi Mitsubuchi, Yasuhiro Indo, Fumio Endo, Junichiro Asaka, and Atsuko Harada</i> | 646 |
| Application of a Thermally Reversible Polymer-Antibody Conjugate in a Novel Membrane-Based Immunoassay                                                                                                      | <i>Nobuo Monji, Carol-Ann Cole, Milton Tam, Lynn Goldstein, Robert C. Nowinski, and Allan S. Hoffman</i>                     | 652 |
| Insulin-like Growth Factor-I Stimulates Endothelin-3 Secretion from Rat Anterior Pituitary Cells in Primary Culture                                                                                         | <i>Hirokazu Matsumoto, Nobuhiro Suzuki, Kunio Shiota, Kinji Inoue, Masao Tsuda, and Masahiko Fujino</i>                      | 661 |

Caldarera</i>                                                      | 939 |
| Transforming Growth Factor $\beta$ Regulates Cystatin C in Serum-Free Mouse Embryo (SFME) Cells                                                                                                          | <i>Michele Solem, Cathleen Rawson, Katherine Lindburg, and David Barnes</i>                                                             | 945 |
| Interaction of Human Immunodeficiency Virus (HIV-1) Fusion Peptides with Artificial Lipid Membranes                                                                                                      | <i>V. A. Slepishkin, G. B. Melikyan, M. S. Sidorova, V. M. Chumakov, S. M. Andreev, R. A. Manulyan, and E. V. Karamov</i>               | 952 |
| Casein Kinase II Activities Related to Hyper-phosphorylation of Human Papillomavirus Type 16-E7 Oncoprotein in Epidermal Keratinocytes                                                                   | <i>Takashi Hashida and Shigeru Yasumoto</i>                                                                                             | 958 |

## Volume 172, Number 3, November 15, 1990

- Leukotriene A<sub>4</sub> Hydrolase: A Zinc Metalloenzyme  
*Jesper Z. Haeggström, Anders Wetterholm, Robert Shapiro,  
 Bert L. Vallee, and Bengt Samuelsson* 965
- Importance of Hydrophobic Residues in  $\alpha$ -Human Atrial Natriuretic Peptide  
 ( $\alpha$ -hANP) for Vasorelaxant Activity  
*Yoshiharu Minamitake, Yasuo Kitajima,  
 Mayumi Furuya, Maki Yoshida, and Shoji Tanaka* 971
- Evidence for Coenzyme Q Function in Transplasma Membrane Electron  
 Transport  
*I. L. Sun, E. E. Sun, F. L. Crane, and D. J. Morré* 979
- Positional Specificity of a *Lupinus albus* Lipoxygenase in Relation to Enzyme  
 Concentration and Effect of a Double Dioxygenation Product of Arachidonic  
 Acid  
*Rivo Hery Andrianarison, Marie Tixier,  
 and Jean Louis Beneytout* 985
- Chelerythrine Is a Potent and Specific Inhibitor of Protein Kinase C  
*J. M. Herbert, J. M. Augereau, J. Gleye, and J. P. Maffrand* 993
- Molecular Oxygen as Electron Acceptor in the NADH-Nitrate Reductase System  
*Peter Ruoff and Catherine Lillo* 1000
- Identification of a Protein Kinase C Activating Factor from Murine  
 Erythroleukemia Cells: Characterization of the Activation Kinetics  
*Bianca Sparatore, Mauro Patrone,  
 Edon Melloni, and Sandro Pontremoli* 1006
- Enzyme Induction in Recovering Dauer Larvae of the Nematode *Caenorhabditis*  
*elegans* in Response to Increasing Concentrations of Food Source in the  
 Recovery Medium  
*Theresa J. Reape and Ann. M. Burnell* 1013
- Effect of Tumor Necrosis Factor/Cachectin on the Activity of the Low Density  
 Lipoprotein Receptor on Human Skin Fibroblasts  
*Kenji Harada, Hitoshi Shimano, Masanobu Kawakami,  
 Shun Ishibashi, Takanari Gotoda, Natsuko Mori,  
 Fumimaro Takaku, and Nobuhiro Yamada* 1022
- A Point Mutation in *norA* Gene Is Responsible for Quinolone Resistance in  
*Staphylococcus aureus*  
*Yoshiro Ohshita, Keiichi Hiramatsu,  
 and Takeshi Yokota* 1028
- Interleukin-4 as a Potent Inhibitor of Bone Resorption  
*Kenichi Watanabe, Yoshiya Tanaka, Isao Morimoto, Katsuya Yahata,  
 Kazuya Zeki, Takashi Fujihira, Uki Yamashita, and Sumiya Eto* 1035
- Anti-inflammatory Glucocorticoids Inhibit the Induction by Endotoxin of Nitric  
 Oxide Synthase in the Lung, Liver, and Aorta of the Rat  
*R. G. Knowles, M. Salter, S. L. Brooks, and S. Moncada* 1042
- Cloning and Sequencing of Human LH/hCG Receptor cDNA  
*Takashi Minegish, Kazuto Nakamura, Yumi Takakura, Kaoru Miyamoto,  
 Yoshihisa Hasegawa, Yoshito Ibuki, and Masao Igarashi* 1049
- Hydrolytic Properties of the (Na<sup>+</sup> + K<sup>+</sup>)-ATPase Isozymes for  $\beta$ -(2-  
 furyl)acryloyl Phosphate, a Pseudosubstrate for the Sodium Pump  
*Jeffrey L. Brodsky and Guido Giudotti* 1055
- 7-Substituted Pterins: Formation during Phenylalanine Hydroxylation in the  
 Absence of Dehydratase  
*Hans-Christoph Curtius, Carmen Adler,  
 Igor Rebrin, Claus Heizmann, and Sandro Ghisla* 1060

- Identification and Purification of Calpactins from Cardiac Muscle and Their Effect on  $\text{Na}^+/\text{Ca}^{2+}$  Exchange Activity  
*A. Sobota, F. Cusinato, and S. Luciani* 1067
- Cautionary Note for DMPO Spin Trapping in the Presence of Iron Ipi  
*Keisuke Makino, Takuya Hagiwara, Akifumi Hagi, Masatoshi Nishi, and Akira Murakami* 1073
- Role of Protein Kinase C in the Inhibition by Fibroblast Growth Factor of Apoptosis in Serum-Depleted Endothelial Cells  
*Satoshiko Araki, Yoshiya Simada, Kazuhiko Kaji, and Hiroshi Hayashi* 1081
- Hydrocortisone-Induced Enhancement of Expression and Changes in Methylation of Pepsinogen Genes in Stomach Mucosa of the Developing Rat  
*Masao Ichinose, Kazumasa Miki, Masae Tatematsu, Chie Furihata, Masashi Matsushima, Yoshikazu Ichihara, Masao Tanji, Toshiro Konishi, Masanobu Obara, Hideshi Inoue, Kiyoshi Kurokawa, Takayuki Takahashi, Takashi Kageyama, and Kenji Takahashi* 1086
- Heterogeneity in Chemotaxis of Neutrophils with Different Densities  
*Hidefumi Miyagawa, Chiharu Okada, Haruhito Sugiyama, Russell J. Hopp, Agandra K. Bewtra, and Robert G. Townley* 1094
- Dual Effects of Dopamine in Rat Adrenal Glomerulosa Cells  
*Nicole Gallo-Payet, Lucie Chouinard, Marie-Noelle Balestre, and Gilles Guillon* 1100
- Expression of the Chloramphenicol Acetyltransferase (CAT) Reporter Gene by the Murine *Cyp1a-2* (Cytochrome P<sub>450</sub>) Promoter in Hepatoma Cell Cultures  
*Roland A. Owens and Daniel W. Nebert* 1109
- Exclusion of an Exon in Monocyte  $\alpha$ -1-Antitrypsin mRNA after Stimulation of U937 Cells by Interleukin-6  
*N. Kalsheker and T. Swanson* 1116
- Soybean Lipoxygenases-1, -2a, -2b, and -2c Do Not Contain PQQ  
*I. Michaud-Soret, R. Daniel, C. Chopard, D. Mansuy, C. Cucurov, V. Ullrich, and J. C. Chottard* 1122
- The Transition of the Higher-Order Structure of Rat Liver Chromatin Takes Place at About 85% Neutralization of DNA Charges  
*Fumiyuki Watanabe* 1129
- Reversal of Endotoxin-Mediated Shock by  $\text{N}^G$ -Methyl-L-arginine, an Inhibitor of Nitric Oxide Synthesis  
*Robert G. Kilbourn, Amal Jubran, Steven S. Gross, Owen W. Griffith, Roberto Levi, James Adams, and Robert F. Lodato* 1132
- Amino Acid Sequence of Human Protein Z, a Vitamin K-Dependent Plasma Glycoprotein  
*Akitada Ichinose, Hiroyuki Takeya, Eric Espling, Sadaaki Iwanaga, Walter Kiesel, and Earl W. Davie* 1139
- Multiple mRNAs Encoding Human Calmodulin  
*Joyce C. Pegues and Felix Friedberg* 1145
- Effect of Thyroid Hormone on Hepatic Cholesterol 7 $\alpha$  Hydroxylase, LDL Receptor, HMG-CoA Reductase, Farnesyl Pyrophosphate Synthetase, and Apolipoprotein A-I mRNA Levels in Hypophysectomized Rats  
*Gene C. Ness, Laura C. Pendleton, Yan Chun Li, and John Y. L. Chiang* 1150
- Protein Conformational "Annealing": Binding to Cytochrome C Refolds the Active Site Region of Recombinant Cytochrome C Peroxidase  
*R. Hake, G. McLendon, and A. F. Corin* 1157
- Modulation of Resting Membrane Potential of Human and Rat Hepatocytes by Sex Steroids  
*S. M. Motzkin, J. Feinstein, and C. Tiribelli* 1163
- Isolation and Characterization of a Novel Peptide Amide from Porcine Brain  
*Ken Takamatsu and Kazuhiko Tatemoto* 1167

- Galactosialidosis: Simultaneous Deficiency of Esterase, Carboxy-Terminal Deamidase, and Acid Carboxypeptidase Activities  
*Ryoichi Kase, Kohji Itoh, Nobuaki Takiyama, Akihiro Oshima, Hitoshi Sakuraba, and Yoshiyuki Suzuki* 1175
- Arachidonic Acid Metabolism by Dioxin-Induced Cytochrome P450: A New Hypothesis on the Role of P450 in Dioxin Toxicity  
*Arleen B. Rifkind, Maureen Gannon, and Steven S. Gross* 1180
- Angiotensin II Can Regulate Gene Expression by the AP-1 Binding Sequence via a Protein Kinase C-Dependent Pathway  
*Kazuhisa Takeuchi, Norifumi Nakamura, Nigel S. Cook, Richard E. Pratt, and Victor J. Dzau* 1189
- [<sup>3</sup>H]DuP 753, a Highly Potent and Specific Radioligand for the Angiotensin II-1 Receptor Subtype  
*Andrew T. Chiu, Dale E. McCall, Paul E. Aldrich, and Pieter B. M. W. M. Timmermans* 1195
- Exudation Induces Clustering of CR1 Receptors at the Surface of Human Polymorphonuclear Leukocytes  
*J.-P. Paccaud, J.-L. Carpentier, and J. A. Schifferli* 1203
- Selective Synthesis and Secretion of a 23-kDa Protein by Neutrophils following Stimulation with Granulocyte-Macrophage Colony-Stimulating Factor and Tumor Necrosis Factor- $\alpha$   
*Shaun R. McColl, Robert Paquin, and André D. Beaulieu* 1209
- Quantitative Renaturation from a Guanidine-Denatured State of the SecA Dimer, a 200-kDa Protein Involved in Protein Secretion in *Escherichia coli*  
*Akeo Shinkai, Mitsuru Akita, Shin-ichi Matsuyama, and Shoji Mizushima* 1217
- Comparison of the Lectin-like Activity of Pertussis Toxin with Two Plant Lectins That Have Differential Specificities for  $\alpha$ (2-6) and  $\alpha$ (2-3)-Linked Sialic Acid  
*Louis D. Heerze and Glen D. Armstrong* 1224
- Molecular Cloning and Expression of Human Arachidonate 12-Lipoxygenase  
*Tanihiro Yoshimoto, Yasuchika Yamamoto, Toshiya Arakawa, Hiroshi Suzuki, Shozo Yamamoto, Chieko Yokoyama, Tadashi Tanabe, and Hiroyuki Toh* 1230
- Movement of Vesicles in Cytoplasmic Streaming in Plasmodium  
*Hajime Honda, Tohru Sakuma, Nobuo Saeki, Koichi Takamatsu, and Koichiro Matsuno* 1236
- The Regulation of *N*-Acetylglutamate Synthetase in Rat Liver by Protein Intake  
*J. P. Colombo, Ursula Pfister, and Heidi Cervantes* 1239
- Glucocorticoids Inhibit the Induction of Nitric Oxide Synthase in Macrophages  
*M. Di Rosa, M. Radomski, R. Carnuccio, and S. Moncada* 1246
- Specific Protein-Protein Interactions of Calsequestrin with Junctional Sarcoplasmic Reticulum of Skeletal Muscle  
*Ernesto Damiani and Alfredo Margreth* 1253
- Modulation of *N*-Acetylglucosaminyltransferase III, IV, and V Activities and Alteration of the Surface Oligosaccharide Structure of a Myeloma Cell Line by Interleukin 6  
*Hirohisa Nakao, Atsushi Nishikawa, Takahiro Karasuno, Tetsuo Nishiura, Masato Iida, Yoshio Kanayama, Takeshi Yonezawa, Seiichiro Tarui, and Naoyuki Taniguchi* 1260
- Anti-influenza Virus Activity of Synthetically Polymerized Phenylpropenoids  
*Hiroshi Sakagami, Kyosuke Nagata, Akira Ishihama, Toshinari Oh-hara, and Yutaka Kawazoe* 1267

- Protein Kinase C Inhibitors Block the Enhanced Expression of Intercellular Adhesion Molecule-1 on Endothelial Cells Activated by Interleukin-1, Lipopolysaccharide, and Tumor Necrosis Factor  
*Thomas A. Lane, Geraldine E. Lamkin, and Edward V. Wancewicz* 1273
- Identification of Transcription Promoter Regions from Rat mtDNA That Are Utilized *in Vivo* by the Bacterial RNA Polymerase  
*Jeffrey M. Staub and Frank J. Castora* 1282
- Desensitization and Muscarinic Resensitization of Force and Myosin Light Chain Phosphorylation to Cytoplasmic  $\text{Ca}^{2+}$  in Smooth Muscle  
*Toshio Kitazawa and Andrew P. Somlyo* 1291
- Aurin Tricarboxylic Acid, the Anti-AIDS Compound, Prevents the Binding of Interferon- $\alpha$  to Its Receptor  
*Yuxiang Gan, James L. Weaver, P. Scott Pine, Kathryn C. Zoon, and Adorjan Aszalos* 1298
- Induction in the Expression of an Unusual Proline-Rich Protein by Pig Tracheal Surface Epithelial Cells Maintained in Primary Culture  
*Johannes Tesfaigzi, Gang An, Reen Wu, and Don M. Carlson* 1304
- Total *in Vitro* Maturation of the *Saccharomyces cerevisiae*  $\alpha$ -Factor Lipopeptide Mating Pheromone  
*Stevan Marcus, Guy A. Caldwell, Chu-Biao Xue, Fred Naider, and Jeffrey M. Becker* 1310
- A *p*-Nitrophenyl Phosphorylcholine Phosphodiesterase from Mouse Brain  
*Dai-Eun Sok and Mee Ree Kim* 1317
- The *CDC4* Gene Product Is Associated with the Yeast Nuclear Skeleton  
*Won-Ja Choi, Michael W. Clark, John X. Chen, and Ambrose Y. Jong* 1324
- Expression of Rabbit Cytochrome P450IIE2 in Yeast and Stabilization of the Enzyme by 4-Methylpyrazole  
*Steven J. Pernecky, Todd D. Porter, and Minor J. Coon* 1331
- A New Class of Powerful Inhibitors of Monoamine Oxidase A  
*Yuan-Zhen Jin, Rona R. Ramsay, Stephen K. Youngster, and Thomas P. Singer* 1338
- In Vivo* ESR Measurement of Free Radicals in Whole Mice  
*Hideo Utsumi, Emiko Muto, Sadao Masuda, and Akira Hamada* 1342
- Requirement for Sialic Acid on Neutrophils in a GMP-140 (PADGEM) Mediated Adhesive Interaction with Activated Platelets  
*Laura Corral, Mark S. Singer, Bruce A. Macher, and Steven D. Rosen* 1349
- Translational Efficiency: Iridovirus Early mRNAs Outcompete Tobacco Mosaic Virus Message *in Vitro*  
*V. Gregory Chinchar and Wei Yu* 1357
- All Fifteen Possible Arrangements of Three Disulfide Bridges in Proteins Are Known  
*Nicholas W. Warne and Michael Laskowski, Jr.* 1364
- Characterization of Soluble vs Membrane-Bound Human Placental 5'-Nucleotidase  
*Mary R. Klemens, William R. Sherman, Nels J. Holmberg, Julie M. Ruedi, Martin G. Low, and Linda F. Thompson* 1371
- Demonstration of Evolutionary Differences between Conserved Antigenic Epitopes in the Minor Nucleocapsid Protein of Human Papillomavirus Types 6b, 16, and 18  
*Matti Lehtinen, Päivi Parkkonen, Jutta Niemelä, and Jorma Paavonen* 1378
- C-Terminal KDEL-Modified Cystatin C Is Retained in Transfected CHO Cells  
*Teit Eliot Johansen, Charlotte K. Vogel, and Thue W. Schwartz* 1384
- Purification of N-Terminal Hexapeptide of Big Gastrin from Human Urine  
*Yoshifumi Higashimoto, Yasuhisa Shinomura, Kazuhiro Nagao, Yuichi Yasunaga, Toshiaki Tamura, and Seiichiro Tarui* 1392

- Essential Role of Nitric Oxide in Descending Inhibition in the Rat Proximal Colon  
*Fumiaki Hata, Toshiaki Ishii, Atsunori Kanada, Naoyuki Yamano,  
Toshiya Kataoka, Tadayoshi Takeuchi, and Osamu Yagasaki* 1400

ERRATUM

- Volume 170, Number 2, July 31, 1990: Hogjun Ji, Qingqing Zhang, and  
Benjamin S. Leung, "Survey of Oncogene and Growth Factor/Receptor  
Gene Expression in Cancer Cells by Intron-Differential RNA/PCR,"  
pp. 569-575 1407  
Author Index for Volume 172 1408

NOTICE

The Subject Index for Volume 172 will appear as part of the cumulative index for the  
year 1990.

## Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been submitted to another Editor of this journal, that it has not been published, and that it is not under consideration for publication elsewhere; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. The manuscript must be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or are under editorial consideration by another journal. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

**Prior to submission for publication, the manuscript must be approved by all of the authors and by the institution where the work was carried out.**

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 4 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.) *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

**To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.**

### Preparation of Manuscripts

*Article length* should not exceed 5 typewritten pages, using one-and-a-half (1½) spacing (W spacing) and 12-point (minimum) type on 8.5 x 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

*Summary.* Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

*Typing.* Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be generated on good quality white bond paper. Manuscripts generated as word-processor or computer printouts are acceptable only if they are of "letter quality." Manuscripts generated by dot-matrix printers are *not* acceptable and will be returned to authors. For typewritten manuscripts a black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be 1½-spaced on one side of the sheet: **only methods, references, footnotes, tables, and figure legends should be single-spaced.** Typing area of the page must not be larger than 6.5 in. wide and 9.5 in. long using 12-point (minimum) type.

*Symbols and Abbreviations* defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

**Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals.** The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [<sup>32</sup>P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

**Submission of data to protein or genetic databases.** The Editors of this Journal encourage the use of databases as repositories for detailed data on protein structure (e.g., x-ray crystallographic coordinates) and on DNA sequences and mapping assignments. Authors are requested to complete data entry and annotation forms (which can be obtained in advance from the Journal Editorial Office or from the databases) and to submit these summaries and database entries (in floppy disk, tape, or hardcopy form) to the database prior to or within one week after submission of the manuscript. This will assure that mapping or sequencing work can be accessed by data retrieval methods. Copies of the data entry forms or other verification of submission and, when available, pertinent accession numbers should be provided with the submitted manuscripts. When this information has been supplied by the authors, published articles will include a footnote indicating the database to which data have been provided and the accession number.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1989) **268**, vii–xxv. Reprints are available from the Publisher.

*Footnotes, references, tables, and figure legends* should be typed single-spaced on separate pages.

**Illustrations and Tables.** Do not attempt to insert figures, figure legends, or tables into the text. This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 x 8 in.); the original drawings should be no larger than 8.5 x 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even black density. Illustrations in color can be accepted only if the authors defray the cost.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

**Page Numbers and Headings.** Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

*References* to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1985. Note the following examples.

1. Graan, T., and Ort, D.R. (1986) *Arch. Biochem. Biophys.* 248, 445-451.
2. Metzler, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298. Academic Press, New York.
3. Rosenfeld, R. G., and Hintz, R. L. (1986) In *The Receptors* (P. M. Conn, Ed.), Vol. III, pp. 281-329. Academic Press, Orlando, FL.

**Note that inclusive pagination must be given.**

*Acknowledgment of Receipt.* Authors desiring acknowledgment of manuscript should enclose a stamped self-addressed card.

*Reprints.* Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.

Signed

\_\_\_\_\_  
Name (and title if not author)

**To be signed by at least one of the authors (who has obtained the assent of the others, if any).** In the case of a "work made for hire" (a work prepared by an employee within the scope of his or her employment or commissioned as a work for hire under a written agreement), an authorized representative of the employer should sign.

Please note: Manuscripts cannot be processed for publication until the Publisher has received this signed form.

If the manuscript is not published by Academic Press, this letter will not take effect.

# ANALYTICAL BIOCHEMISTRY

## Methods in the Biological Sciences

Editor-in-Chief

**WILLIAM B. JAKOBY**

National Institutes of Health, Bethesda, Maryland

Editorial Office: 1250 Sixth Avenue, San Diego, CA 92101

**Analytical Biochemistry** emphasizes methods and methodology in the biological and biochemical sciences and all related fields. The journal publishes the results of original research as well as reviews of methods.

### **Publishing Methods in:**

- Analytical techniques
- Membranes and membrane proteins
- Molecular genetics: cloning, sequencing, and mutagenesis
- Novel methods of protein purification
- Immunological techniques of applicability in biochemistry
- Immunoassays that introduce a unique approach
- Cell biology, general cell and organ culture
- Pharmacological and toxicological research techniques.

Volumes 192–199 (1991), 16 issues

ISSN 0003-2697

In the U.S.A. and Canada: \$1032.00

All other countries: \$1230.00

Sample copies and privileged personal rates are available upon request.

| Volume 170, Number 2, July 31, 1990: Hogjun Ji, Qingqing Zhang, and<br>Benjamin S. Leung, "Survey of Oncogene and Growth Factor/Receptor<br>Gene Expression in Cancer Cells by Intron-Differential RNA/PCR,"<br>pp. 569-575 | 1407 |
| Author Index for Volume 172                                                                                                                                                                                                 | 1408 |

#### NOTICE

The Subject Index for Volume 172 will appear as part of the cumulative index for the year 1990.

(Continued from following page)

- Anti-influenza Virus Activity of Synthetically Polymerized Phenylpropenoids  
*Hiroshi Sakagami, Kyosuke Nagata, Akira Ishihama, Toshinari Oh-hara, and Yutaka Kawazoe* 1267
- Protein Kinase C Inhibitors Block the Enhanced Expression of Intercellular Adhesion Molecule-1 on Endothelial Cells Activated by Interleukin-1, Lipopolysaccharide, and Tumor Necrosis Factor  
*Thomas A. Lane, Geraldine E. Lamkin, and Edward V. Wancewicz* 1273
- Identification of Transcription Promoter Regions from Rat mtDNA That Are Utilized *in Vivo* by the Bacterial RNA Polymerase  
*Jeffrey M. Staub and Frank J. Castora* 1282
- Desensitization and Muscarinic Resensitization of Force and Myosin Light Chain Phosphorylation to Cytoplasmic  $Ca^{2+}$  in Smooth Muscle  
*Toshio Kitazawa and Andrew P. Somlyo* 1291
- Aurin Tricarboxylic Acid, the Anti-AIDS Compound, Prevents the Binding of Interferon- $\alpha$  to Its Receptor  
*Yuxiang Gan, James L. Weaver, P. Scott Pine, Kathryn C. Zoon, and Adorjan Aszalos* 1298
- Induction in the Expression of an Unusual Proline-Rich Protein by Pig Tracheal Surface Epithelial Cells Maintained in Primary Culture  
*Johannes Tesfaigzi, Gang An, Reen Wu, and Don M. Carlson* 1304
- Total *in Vitro* Maturation of the *Saccharomyces cerevisiae*  $\alpha$ -Factor Lipopeptide Mating Pheromone  
*Stevan Marcus, Guy A. Caldwell, Chu-Biao Xue, Fred Naider, and Jeffrey M. Becker* 1310
- A *p*-Nitrophenyl Phosphorylcholine Phosphodiesterase from Mouse Brain  
*Dai-Eun Sok and Mee Ree Kim* 1317
- The *CDC4* Gene Product Is Associated with the Yeast Nuclear Skeleton  
*Won-Ja Choi, Michael W. Clark, John X. Chen, and Ambrose Y. Jong* 1324
- Expression of Rabbit Cytochrome P450IIE2 in Yeast and Stabilization of the Enzyme by 4-Methylpyrazole  
*Steven J. Pernecky, Todd D. Porter, and Minor J. Coon* 1331
- A New Class of Powerful Inhibitors of Monoamine Oxidase A  
*Yuan-Zhen Jin, Rona R. Ramsay, Stephen K. Youngster, and Thomas P. Singer* 1338
- In Vivo* ESR Measurement of Free Radicals in Whole Mice  
*Hideo Utsumi, Emiko Muto, Sadao Masuda, and Akira Hamada* 1342
- Requirement for Sialic Acid on Neutrophils in a GMP-140 (PADGEM) Mediated Adhesive Interaction with Activated Platelets  
*Laura Corral, Mark S. Singer, Bruce A. Macher, and Steven D. Rosen* 1349
- Translational Efficiency: Iridovirus Early mRNAs Outcompete Tobacco Mosaic Virus Message *in Vitro*  
*V. Gregory Chinchar and Wei Yu* 1357
- All Fifteen Possible Arrangements of Three Disulfide Bridges in Proteins Are Known  
*Nicholas W. Warne and Michael Laskowski, Jr.* 1364
- Characterization of Soluble vs Membrane-Bound Human Placental 5'-Nucleotidase  
*Mary R. Klemens, William R. Sherman, Nels J. Holmberg, Julie M. Ruedi, Martin G. Low, and Linda F. Thompson* 1371
- Demonstration of Evolutionary Differences between Conserved Antigenic Epitopes in the Minor Nucleocapsid Protein of Human Papillomavirus Types 6b, 16, and 18  
*Matti Lehtinen, Päivi Parkkonen, Jutta Niemelä, and Jorma Paavonen* 1378

- Modulation of Resting Membrane Potential of Human and Rat Hepatocytes by Sex Steroids  
*S. M. Motzkin, J. Feinstein, and C. Tiribelli* 1163
- Isolation and Characterization of a Novel Peptide Amide from Porcine Brain  
*Ken Takamatsu and Kazuhiko Tatemoto* 1167
- Galactosialidosis: Simultaneous Deficiency of Esterase, Carboxy-Terminal Deamidase, and Acid Carboxypeptidase Activities  
*Ryoichi Kase, Kohji Itoh, Nobuaki Takiyama, Akihiro Oshima, Hitoshi Sakuraba, and Yoshiyuki Suzuki* 1175
- Arachidonic Acid Metabolism by Dioxin-Induced Cytochrome P450: A New Hypothesis on the Role of P450 in Dioxin Toxicity  
*Arleen B. Rifkind, Maureen Gannon, and Steven S. Gross* 1180
- Angiotensin II Can Regulate Gene Expression by the AP-1 Binding Sequence via a Protein Kinase C-Dependent Pathway  
*Kazuhisa Takeuchi, Norifumi Nakamura, Nigel S. Cook, Richard E. Pratt, and Victor J. Dzau* 1189
- [<sup>3</sup>H]DuP 753, a Highly Potent and Specific Radioligand for the Angiotensin II-1 Receptor Subtype  
*Andrew T. Chiu, Dale E. McCall, Paul E. Aldrich, and Pieter B. M. W. M. Timmermans* 1195
- Exudation Induces Clustering of CR1 Receptors at the Surface of Human Polymorphonuclear Leukocytes  
*J.-P. Paccaud, J.-L. Carpentier, and J. A. Schifferli* 1203
- Selective Synthesis and Secretion of a 23-kDa Protein by Neutrophils following Stimulation with Granulocyte-Macrophage Colony-Stimulating Factor and Tumor Necrosis Factor- $\alpha$   
*Shaun R. McColl, Robert Paquin, and André D. Beaulieu* 1209
- Quantitative Renaturation from a Guanidine-Denatured State of the SecA Dimer, a 200-kDa Protein Involved in Protein Secretion in *Escherichia coli*  
*Akeo Shinkai, Mitsuru Akita, Shin-ichi Matsuyama, and Shoji Mizushima* 1217
- Comparison of the Lectin-like Activity of Pertussis Toxin with Two Plant Lectins That Have Differential Specificities for  $\alpha$ (2-6) and  $\alpha$ (2-3)-Linked Sialic Acid  
*Louis D. Heerze and Glen D. Armstrong* 1224
- Molecular Cloning and Expression of Human Arachidonate 12-Lipoxygenase  
*Tanihiro Yoshimoto, Yasuchika Yamamoto, Toshiya Arakawa, Hiroshi Suzuki, Shozo Yamamoto, Chieko Yokoyama, Tadashi Tanabe, and Hiroyuki Toh* 1230
- Movement of Vesicles in Cytoplasmic Streaming in Plasmodium  
*Hajime Honda, Tohru Sakuma, Nobuo Saeki, Koichi Takamatsu, and Koichiro Matsuno* 1236
- The Regulation of *N*-Acetylglutamate Synthetase in Rat Liver by Protein Intake  
*J. P. Colombo, Ursula Pfister, and Heidi Cervantes* 1239
- Glucocorticoids Inhibit the Induction of Nitric Oxide Synthase in Macrophages  
*M. Di Rosa, M. Radomski, R. Carnuccio, and S. Moncada* 1246
- Specific Protein-Protein Interactions of Calsequestrin with Junctional Sarcoplasmic Reticulum of Skeletal Muscle  
*Ernesto Damiani and Alfredo Margreth* 1253
- Modulation of *N*-Acetylglucosaminyltransferase III, IV, and V Activities and Alteration of the Surface Oligosaccharide Structure of a Myeloma Cell Line by Interleukin 6  
*Hirohisa Nakao, Atsushi Nishikawa, Takahiro Karasuno, Tetsuo Nishiura, Masato Iida, Yoshio Kanayama, Takeshi Yonezawa, Seiichiro Tarui, and Naoyuki Taniguchi* 1260
